

TAPASH SUTRADHAR

Software Development Engineer | SDET / QA Engineer
Kolkata, India | +91 9749177979 | sutradhartapashapd@email.com | [linkedin://tapashsutradhar](https://www.linkedin.com/in/tapashsutradhar) | [github://tapashsutradhar](https://github.com/tapashsutradhar)
Nationality: Indian | **languages:** C1/Fluent, German (B1/Intermediate), Hindi/Bengali (Native)
Work Status: Open to International Relocation | Notice Period: Immediate / 30 Days

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of cross functional experience across SDET, Software Quality Assurance, Software development and data analytics. Proficient in Java, Python, C#/.NET, JavaScript and SQL with hands-on experience building scalable web features, designing Playwright/Selenium test automation frameworks and executing complex SQL data validation pipelines. Skilled in bridging core software engineering with data quality analysis and technical system design within Agile environments.

TECHNICAL SKILLS

- **Languages:** Java, Python, C#/.NET, JavaScript, SQL (SQL Server, PostgreSQL), HTML5, CSS3
- **Automation & Testing:** Playwright, Selenium, Appium, TestNG, Postman (API Testing), UAT, Junit, BlackBox
- **Data & Analytics:** Advanced SQL Query, ETL, DBT, Pandas, Data Validation, Power BI, Tableau, Database Schema Mapping, Excel
- **Frameworks & Web:** Spring Boot, React, REST APIs, Microservices Architecture
- **Tools & DevOps:** Git, GitHub Actions, Jenkins, Jira, Confluence, CI/CD Pipelines, Agile/Scrum

PROFESSIONAL EXPERIENCE

Seap Infotech (Aakavs Consulting Inc., USA) Kolkata, India
Software Development Engineer (SDE) Jan 2026 – Present

- Developed modular React frontend components and integrated scalable C#/.NET, REST APIs, cutting average page load latency by 200ms and improving overall web UI responsiveness by 25%.
- Translated functional business requirements into production ready web features, collaborating with cross functional Agile teams to reduce sprint delivery cycles by 15%.
- Streamlined data flow between frontend interfaces and backend SQL databases, ensuring system performance remained stable during peak user traffic.

Software Test Engineer (SDET) / QA Automation Engineer Oct 2025 – Jan 2026

- Built an automated test framework from scratch using Java, Playwright and TestNG, replacing manual testing efforts and cutting nightly regression runtime down to under 15 minutes through parallel execution.
- Integrated E2E and API test suites directly into GitHub Actions CI/CD pipelines, catching integration issues early and reducing deployment defects by 20%.
- Wrote structured Appium test automation scripts for Android and iOS mobile app layouts, maintaining 98%+ pass rates across device configurations and identifying layout issues prior to production releases.

Data Analyst Jul 2024 – Aug 2025
WBSETCL Kolkata, India

- Gathered functional requirements from operations stakeholders and translated them into clear technical specs, SQL data models and user stories for engineering teams.
- Built automated Python (Pandas) and dbt validation models to audit cloud ETL data pipelines, preventing transactional anomalies and maintaining 100% data integrity across MySQL and cloud database tables.
- Engineered advanced SQL queries and MS Excel data reconciliation models, automating schema verification checks and reducing manual audit efforts by 60%.
- Developed interactive Power BI and Tableau dashboards to present key operational performance metrics to executive leadership, cutting reporting turnaround time by 40% and guiding resource allocation.
- Led User Acceptance Testing (UAT) and mapped workflow flowcharts, bridging communication gaps between business management and core software engineering teams.
- Analyzed operational quality trends, root cause gaps, and performance metrics, sharing actionable insights with stakeholders to drive continuous process improvement and ensure SOP compliance.

- Developed responsive web UI modules using JavaScript, HTML5 and CSS3, achieving 100% on time completion of assigned Jira user stories across Agile sprint cycles.
- Wrote and executed automated Java and Python unit tests, catching application bottlenecks early in development and reducing pre production bugs by 30%.
- Participated in daily Scrum meetings and sprint planning sessions, translating technical task requirements into functional code to ensure software stability and early defect detection prior to build deployments.

PROJECTS

- **Enterprise Core Banking & Ledger Engine:** Architected a multi tenant backend API using **Java (Spring Boot)** and **OAuth2/JWT**, combined with **Playwright/REST Assured** automated contract testing and **dbt/Power BI** pipelines for real time financial audit reporting.
- **Global Supply Chain & Trade Settlement Platform:** Built **FastAPI** microservices and a **Selenium/TestNG** automated testing framework for cross border logistics, integrating **Great Expectations** data governance checks to validate shipment schema and customs records.
- **Real Time Healthcare Telemetry & Data Governance Engine:** Engineered a regulatory-compliant medical data pipeline using **Python, SQL and Soda Core** to ingest raw patient telemetry, apply automated schema cleaning and feed HIPAA/GDPR analytics dashboards using Power BI.
- **Enterprise Airport Operations Platform (Data Analysis & Business Insights):** Built an automated ETL pipeline using **Python, Advanced SQL and dbt** to analyze flight turnaround data, predict gate congestion and generate **Power BI/Tableau** dashboards that optimized ground handling turnaround times across international hubs.

EDUCATION

- **Bachelor of Technology (B.Tech.) in Electrical Engineering** | CGPA: 9.17 / 10

Bengal Institute of Technology and Management (BITM), India

Sep 2023

- **Diploma in Engineering** | CGPA: 8.50 / 10

Nibedita Polytechnic, India

Aug 2019

COURSEWORK & TRAINING

- Software Testing: QA Fundamentals to Expert
- Project Management (Agile and Scrum) - Google
- IBM & Google Data Science and Advanced Data Analytics
- Full Stack Development Certification
- Business Analysis (IIBA - ECBA/CBAP) (PMI-PBA) – Udemy
